

Prepare the dataset

It is the process of preparing raw data so that it is suitable for further processing and analysis.

Once we load the data, we need to prepare it.

- Prepare Calculations of Year, Month, Day fields and the related Navigation path.
- Create a Few more Calculations – Target Sales, Min Sales, Max Sales, Middle Range Sales.

Select the dataset from the prepare data section.

Once the dataset is loaded make the necessary calculations and navigation path then save the dataset
